DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the PCT drawings, in particular Figure 2, are too small and of too poor quality to see clearly what is being illustrated. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18-20, 22, 29-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi (US # 6,803,529). Takahashi discloses the claimed invention (Fig.s 1 & 4) including a hollow tubular longitudinal supporting frame (71), an additional supporting frame part (72), at least one transverse supporting frame part (unlabeled plate lying above leg 10 and below load cell support 75 in Figure 4), a weighing cell (5), and a longitudinal weighing belt (17). The supporting frame also has an opening 71a.

The intended use statement in claim 33 that this opening is for "ballast material" does not carry any patentable weight. See *In re Schreiber*, 128 F.3d 1473, 1477, 44 USPQ2d 1429, 1431 (Fed. Cir. 1997).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi (US # 6,803,529). Takahashi does not have an opening in the front side of the longitudinal part. However, the examiner notes that it is known to make a service opening in a housing, and therefore it would have been obvious to the ordinary practitioner to include such a service opening in the frame 71 to allow easy access to the load cell. See *MPEP* § 2144.03. The location of this opening in the "end" is seen as being a mere rearrangement of parts, which the courts have held to be obvious. See *In re Japikse*, 181 F.2d 1019, 86 USPQ 70 (CCPA 1950); and, *In re Kuhle*, 526 F.2d 553, 188 USPQ 7 (CCPA 1975).

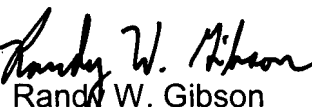

Conclusion

6. Claims 21 and 23-28 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
